ALFA 40
ALFA 50
ALFA 70

**DOUBLE INDEPENDENT
ADJUSTED BENDING
MACHINES**
3 DRIVING ROLLS

**Our machines are
very flexible and
suitable to all kinds
of sections.**

They are perfect for the
manufacture of flanges,
coils and heat
exchangers, frames
and roll bars for the car
and hearth moving
machines industry and
to the most varied
applications.

(*) LEGEND REMARKS

- Work to be done with normally supplied rolls.
- For occasional works, normally supplied rolls are used. For special requirements and continuous works, the use of special rolls would be suggested.
- ▲ Work to be done with "AI" special straightener with double correction.
- ❖ Work to be done with tensioning brace rods to be mounted at the shafts' ends.
- ★ Work to be done with special rolls.
- * Work to be done with tube special rolls. Sometimes it is possible to order modular rolls. If tubes have a thick wall thickness, you can use universal rolls for the models where they are included (see "TECHNICAL DATA" and "ACCESSORIES").
- Work to be done with tube rolls. For each tube diam., a set of rolls is required.
- ◆ Work to be done with long shafts. In most cases it is necessary to equip the machine with tensioning brace rods too.
- ⊕ Work to be done with rolls and/or special equipment.
- ▲ Max. performance for occasional works.
